1. Department of Japanese Studies(일본지역연구과)

The department of Japanese Studies analyzes Japanese culture and social science. It develops experts in Korea and Japan cooperation. Especially though specialized educational courses where majors study Japan's political diplomacy and traditions, experts can contribute to active academic study.

2. Department of Social Welfare(사회복지학과)

The society of Korea is now a developed country, having

demand for welfare services. Experts are needed for the expanding social welfare structures. To satisfy these demands, specialized knowledge and techniques are needed. For this, the department creates new theories and cultivates practical capabilities for new welfare services by opening a social welfare master's course to develop and produce social welfare experts, professional researchers within the social welfare fields

3. Department of Mechatronics Engineering(메카트로닉스공학과)

The department's goal is effectively apply micro electronics elements and micro processors to control the computers of machine systems. Automated machines such as cars, home appliances and robots are increasing the demand for the mechatronics fields. The department educate professionals who can research designs and control operations of machine systems. Focus is given to mechatronics technology and automated processing technology that can be merged with up-to-date IT technology.

4. Department of Architecture(건축학과)

The architecture is an applied and practical science. It is a study that provides usable and artistic spaces to human-beings. The graduate school studies the art and science of architectural culture. Focus is given to technology and solving future-oriented problems.

5. Department of Bio-Chemical Engineering(생명화학공학과)

The dual degree master's program in Biotechnology at Dongseo University, Technical University of Berlin, and Friedrich-Alexander University Erlangen-Nuremberg was established with a curriculum to prepare students as world class Biotechnology professionals who will become competent members of the globalized and information-oriented society. Biotechnology is an integrated field that encompasses various academic interests including chemistry, biology, chemical engineering, and genetics. It not only includes studies of living cells but also includes technical analysis, production and engineering processes. Biotechnology finds applications in food sciences as well as in pharmaceutical and

medical sciences.

6. Department of Civil Engineering(토목공학과)

The department of Civil Engineering is a subject that researches how natural environments can become more usable and comfortable. This major focuses on structural engineering, solidification engineering, water engineering, constructions work and surveying. The major concentrates to develop talented people that have a vision for the future with the techniques that are needed in this 21st century's global and information-oriented era with the right infra-structure for the architectural environment.

7. Department of Visual Contents(영상콘텐츠학과)

The department of Visual Contents focuses on creating imagery contents, creating contents technology and marketing/advertising contents. Students take courses in the arts, humanities and science. Students learn to solve real-life problems

8. Department of Ubiquitous IT(유비쿼터스IT학과)

The department of Ubiquitous IT has its basis in computer information and communication with computer engineering and information networks engineering to develop professionals and expert researchers for computer internet application services, creating multimedia contents and information network technology. A solid education course combines practical and project-oriented courses to develop talented people that are creative, unique and have good designing capabilities.

9. Department of Design(디자인학과)

The course focuses on developing design leaders that have new sensitivities and designing philosophies, going through practical education that have maximized the synergy effects of culture, IT, business administration, services and design.

10. Department of Service Innovation Design(서비스 디자인학과)

The purpose of the present major is placed on the T-shaped talent training as the major for the multi-disciplinary fusion studies of the engineering, humanity as well as the studies of design. Furthermore, it has placed its purpose on the talent training enabled to freely correspond against the future-oriented

industrial developments and global trends and is operating the entire curriculum in English. In addition, the various issues of the society are approached from the social science perspective and aim towards the research-oriented education through the connections amongst academics.

11. Master of Business Administration

As the first frontier graduate school in East Asia, the school not only has a general MBA course but also has special programs that consider regional and cultural characteristics of Busan and Fukuoka so that after the students graduate, they can directly go and work at the needed positions. The course cooperates and progresses with the developing researches of Busan and professors of the Korean Research Center from Japan's Kyushu University to progress on and offline classes.

12. Department of Psychology for Christian Counseling(기독교상담심리학과)

This graduate school is grounded in the theories of counseling psychology as well as a worldwide philosophy of Christianity.

The students of this graduate school will go through studies and education to develop into experts and workers with scholastic capabilities and professional devotion. As a counseling teacher for graduate school students, a general study will provide theories and actual applications. Furthermore, all the professors come from a Christian point of view. This program develops professionals for Christian counseling.

13. Department of Social Welfare(사회복지학과)

The society of Korea is now a developed country, having demand for welfare services. Experts are needed for the expanding social welfare structures. To satisfy these demands, specialized knowledge and techniques are needed. For this, the department creates new theories and cultivates practical capabilities for new welfare services by opening a social welfare master's course to develop and produce social welfare experts, professional researchers within the social welfare fields.

14. Department of Missionary Music(선교음악학과)

The purpose of establishing the department of missionary music

is to provide various kinds of high-quality education for would-be church music students that wish to become leaders of church music. The department's basic purpose is to study missionary music as one of the most important factor for a sermon. This department doesn't just focus on a specific religious sect, having the major research on various kinds of traditional missionary music. Because of this, the education course of this department studies how to harmonize the everyday music of today with the traditional sermon chorus, hymns and instrumental music. It focuses on balancing the theological sides of missionary music with practical music techniques.

VI. Campus Life (Residence Hall)

In an era of extreme competition that surpasses ideology, we nurture talent for the future in the educational environment we provide. Dongseo University is equipped with facilities such as a Student Union Building and an "International House," that will serve as models for a globalized campus. With two basement floors and 13 stories above the ground, the total building size of the International House is 5,948m². It accomodate 400 people. It also has a community kitchens, lounges, banking facilities, and other conveniences to create an comfortable academic atmosphere for its residents.

VII. Important Notes

1. Dongseo University Scholarship Program

Under the scholarship program, Dongseo University will award young prospective students from all over the world. The fellows should show outstanding potential for future study based on previous study and careers. The aim of the program is to give young students an opportunity to spend an extended period of time in South Korea at an early stage in their careers. After returning to their careers in their home countries, they have the potential to become intermediaries between their home countries and Korea as they are assumed to take important positions in the fields of economy, science, politics and society.

2. Scholarship Benefits

Scholarships are offered for the minimum period necessary for the individual to complete the academic program. Dongseo provides various types of scholarships depending on their qualification and achievements. The Scholarship System operates effectively for

many students.

You can enjoy the benefits of various scholarships as followings:

Full Scholarship A: Full tuition and housing are offered.

Full Scholarship B: Full tuition is offered.

Living expenses can be offered depending on the available project.

3. International Dual Degree Program

The dual-degree programs provide opportunities for students to study at a foreign university while keeping their status at the enrolled school. When the students satisfy their graduation requirements, they receive degrees from both schools.

2. BUSAN CITY

1) Location

Busan, located on the southeastern tip of the Korean peninsula. The city is adjacent to South Gyeongsang province and facing the Korea Strait to the south. It borders Ulsan metropolitan city and Yangsan city to the north and Kimhae city lies to the west. Among the cities located on the similar latitude to Busan are Tokyo in Japan, Zhongshan in China, Algiers in Algeria and Oklahoma city in the U.S. Busan shares the similar longitude with Verkhoyansk in Siberia, Nagasaki in Japan and Darwin in Australia.

2) History

Busan has been populated since 15000 years ago in the paleolithic period. It was after the neolithic era, however, that a sizable amount of population began to live in the city. Busan city managed to make rapid and impressive strides since the port of Busan became an international port in 1876. 1905 marks the year that Gyeongbu railway line was built, prompting the construction of piers and harbors in Busan. Busan grew up to a city with a provincial government as Gyeongnam provincial capital was moved to Busan in 1925. The city also served as a temporary capital of Korea running overall operations of the country during Korean War(1950) In 1963, Busan became a directly governed city(Jikhalsi), led economic development of Korea in the forefront since until 1970s and was elevated to Busan is Korea's leading port and a world-class city of culture and tourism that hosts a wide variety of events and festivals such as Pusan international film festival, Busan Biennale and Busan firework festival.

3) Facts about Busan

- Size : 765.64km² (0.8% of national territory)
- Administrative divisions : 15gu(district), 1 gun(county), 216 dong(neighborhood), distance from east to west : 51km, distance from south to north : 48km
- Population : Approximately 3.6 million in total
(Male : Approximately 1.79 million, Female: Approximately 1.8million)
- Time difference : 8 hours and 37 minutes faster than Greenwich time, about 24 minutes later than Korean standard time

4) Climate

Busan, lying to the east of Eurasia continent, hence under the direct influence of East Asia periodic wind, is located in the southeastern most tip of the Korean peninsula and boasts temperate climate with 4 distinct seasons. The city's yearly average temperature is 15°C with its annual precipitation of 1,176mm. The city has relatively strong winds compared to other regions of Korea.

<Spring>

Spring in Busan begins in early March and lasts until around the end of June. In the beginning of March you can enjoy beautiful ume blossoms and dandelions on the street will greet you after mid March. April is month when peach flowers are in full bloom, swallows return looking to build a new nest in warm Busan and the frogs awaken from long winter hibernation.

<Summer>

Summer in Busan is from late June through early September with monsoon setting in at the end of June. Scorching weather continues for weeks from late July to mid August with daily highs reaching above 34.5°C.

<Autumn>

Autumn starts in early September and continues until late November. During these months, Busan is placed under the effect of continental high pressure, leaving the city with clear skies and pleasant temperatures. It gets chilly in the mornings and evenings towards the beginning of September.

<Winter>

Temperatures drop sharply at the end of November. You will feel much colder than it actually is due to the chilling winds blown from the oceans although the city maintains mild climates(average temperature of 3.8°C) compare to other parts of Korea.
